Summary

Over 7 years of experience in software development focusing on backend development, CI/CD and automation.

Professional Experience

Site Reliability Engineer (AWS) Sep 2025 - Current

GoingCloud

- Led billing system's improvements by centralizing fragmented knowledge, building a dedicated development environment, and testable billing logic.
- Codified critical existing services into IaC version control, bringing previously unmanaged infrastructure under consistent review and deployment controls.

Site Reliability Engineer (CI/CD, Terraform, Helmfile, Datadog) May 2024 - Aug 2025

Moway Tech

- Managed GCP and AWS project's infrastructure deployment with infrastructure as code(IaC) and Helm
- Built a PoC onboarding assistant using LLM tool calling and Confluence, with planned tagging and RAG retrieval
- Using Datadog and GCP Cloud Monitoring to enhance service stability through proactive logs and metrics analysis
- Designed and optimized a reusable Helm Chart to enable flexible and scalable service management
- Modularized GitLab CI configurations into reusable templates for consistent and scalable pipeline management
- Integrated CRD and Shell Script to optimize CI/CD pipeline's reliability
- Improved CI/CD pipeline efficiency, reducing execution time from 30 minutes to less than 10 minutes

Full-Stack Engineer (Vue.js, Node.js, MSSQL) Oct 2022 - Apr 2024

SuperAlloy

- Developed an internal production workflow management system with Vue, Node.js, and MSSQL, implementing role-based access control
- Built a temporary file storage system with access control using Vue, Node.js, and MSSQL
- Optimized database queries with open-cursor and Redis, reducing response time from 120 seconds to 2 second
- Optimized API performance by refactoring ORM-based DB operations into stored procedures, achieving a 30% improvement
- Analyzed MSSQL execution plans to identify and optimize database query bottlenecks

Mechanical Engineer (CNC) Mar 2019 - Apr 2022

HHO Automation

- Responsible for CNC tuning, including machine setup and CNC program development and optimization
- Led cross-functional coordination for the company's first automation equipment delivered to China, overseeing installation, testing, pilot production, and small-scale manufacturing

Side Projects

LineTour

- Engineered modular Gitlab CI/CD templates
- Developed and implemented agentic tools in Python with Claude-Code and Codex

Engineered a flexible and scalable infrastructure for "程人頻道"

techporn.io

- Achieved 50% cost reduction while upgrading from GCE to GKE
- Designed scalable Helmfile infrastructure enabling cross-environment management
- Led investigation of production 499 timeouts using observability (kube-prometheus-stack), systematically ruling out infra-level causes and isolating upstream PostgreSQL performance bottleneck

Skills

Programming Languages: Node.js, Python

Framework: Express.js, FastAPI

Database: MSSQL, SQLite, Redis

CI/CD: Gitlab-CI, GitLab-Agent

Infrastructure as Code: Terraform, Helmfile

Cloud-Native: Kubernetes, GKE (GCP), EKS (AWS)

OS: Linux, Shell

Monitoring: Datadog, GCP Cloud Monitoring

Education & Certificate

National Yunlin University of Science and Technology

July 2013 - June 2017

Bachelor of Electronic Engineer

Google Professional Cloud Architect

Mar 2025

Languages

Mandarin (Native)

English (Professional Working Proficiency)
